If you want to find official representatives, you are welcome to our list of Casio Official Sites all over the World. As an Amazon Associate CasioWatchParts.com earns a commission from purchases from its links to Amazon. In addition to the band, even the watchs buttons are ion plated to a black finish. The DW5600MS, DW6900MS, and G9000MS are equipped with a lightondark digital display to match the overall color theme. GShock is an abbreviation for Gravitational Shock. The watches in the GShock line are designed primarily for sports, military and outdoorsoriented activities; nearly all Gshocks are digital or a combination of analog and digital and have a stopwatch feature, countdown timer, electroluminescent backlight and 200metres of water resistance.During a visit to a playground, Ibe discovered that in a rubber ball, the centre of the ball doesnt suffer the effects of the shock during a bounce on a rough surface which gave him the idea to implement that concept into the watch.Sales were sluggish in Japan as people preferred dress watches. In order to promote the GShock worldwide, the American division of Casio released a commercial in which an ice hockey player used the DW5000C as a hockey puck to demonstrate the toughness of the watch. The commercial gained negative publicity and Casio was accused of false advertising. A TV news channel then set out to conduct live tests on the DW5000C to check whether it was as tough and durable as advertised. This involved repeating the action shown in the commercial. The DW5000C survived the impact of the hockey stick, and the GShock gained popularity among the general public. The popularity of GShocks increased throughout the 1990s.Many newer models feature metal steel or titanium bands and a mix of analogdigital timekeeping, analog timekeeping or digital timekeeping.

New limited models are introduced more frequently through the year. Special models are released upon the anniversary celebration of the G Shock brand and are sold through selected retail channels. Ex Special ForcesBritish SAS soldier Andy McNab mentions in several of his novels how his character Nick Stone relies on a GShock watch. According to Mark Bowden s book Blackhawk Down, the DELTA Operators wore GShock watches during the combat events of 3 and 4 October 1993.Some include Tough Solar battery charging and Multiband 6 time synchronisation through radio signals from six transmission stations worldwide. The MTGS1000, GWA1000, and GPW1000 feature Triple G Resist which includes resistance to shock, centrifugal gravity, and vibration. In 2014, Casio introduced the GPS Hybrid Wave Ceptor feature in the GPW1000 Gravitymaster that allows the watch to synchronize the time through GPS signals and also adjusts the time zone automatically.The GPRB1000 is a GPS Hybrid Wave Ceptor model which relies on GPS and atomic time keeping in order to keep perfect time. The model also has triple sensors altimeter, barometer and compass as well as a backtracking function which allows the user to return to the same point from where he started the journey by the use of a map, a function which was previously exclusive for Casios ProTrek line of watches. The watch also features Bluetooth connectivity which allows it to connect to a smart phone via an app and allows it to upload log data in the phone, download map information from the phone and also synchronise itself with the phone in order to keep perfect time. The watch comes without a replaceable battery.The following is a list of the six atomic time transmittersThis is the newest additional signal; older multiband 5 watches will not be able to connect to this signal, and must be upgraded to a newer multiband 6 watch in order to synchronise from there.These models were the very first GShock watches to have a countdown timer.

The countdown timers on these models were designed to count down for surfing competitions, some of the later models have a yacht timer, moon and tide graphs so a surfer can keep track of the progress while competing on the water. Many of these models came equipped with a pair of strap adapters and a single onepiece resin or nylon band. Resin bands for these models had open gaps or slits through the band. Casio refers to them as drainage slits; the idea is that water will drain out with no problems while in action when surfing. Most of these series models had a translucent band.

These models were branded as XTreme for the Japanese domestic market.They were designed for snowboarding and skateboarding competitors and competitions. The only difference is that these models came with nylon velcro bands.Retrieved 23 December 2019. By using this site, you agree to the Terms of Use and Privacy Policy.
